

Econopolis Smart Convictions Fund

Description of the fund

Econopolis Smart Convictions is a compartment of Econopolis Funds SICAV, a UCITS fund under Luxembourg law. The fund aims to deliver a long-term return to investors via investments in other funds, ETF's, equity, bonds and monetary instruments, without geographical restrictions and without restrictions concerning sector or currency allocation. The fund is aimed at investors with an investment horizon of more than 5 years.

Manager's comments:

Smart Convictions had a more difficult month in September, with both slight losses in equities and bonds. In equities, the themes of climate, demographics and Belgium were under pressure. Growth countries were flat. Technology, the largest thematic position, did well, driven by further acceleration in infrastructure build-out for AI. In terms of individual equity positions in the fund, there were mostly negative outliers. ASML corrected sharply after an unexpected profit warning. L'Oreal continued its YTD decline after a weak quarterly result, especially in China, led to further negative earnings revisions. And Astrazeneca stumbled on an investigation into malpractice in China, and worse-than-expected news around a cancer drug. This was not offset by positive moves in the portfolio, such as Wolters Kluwer and Danone. We sold our positions in Air Liquide and Michelin, and reduced positions in Growth, Climate and Belgium ahead of the US elections. We introduced Swiss chocolate producer Lindt & Sprungli as a new position. Lindt has a strong market position with good pricing power thanks to a strong brand. This allows them to post higher-than-average organic growth through the cycle, with margin expansion as well. Unlike other snack food producers, it is less vulnerable to the impact of GLP-1 thanks to an emphasis on 'lower volume/higher quality'. The unexpected jump in US 10-year interest rates ahead of the election, and weakness in exchange rates in Growth Countries weighed on our bond portfolio.

Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk may vary significantly if you redeem the product early and you may get back less. The summarised risk indicator is a guide to the risk level of this product compared to other products. It shows how likely the product is to lose money due to movements in the markets or because we are unable to pay you out. We have classified this product as 3 out of 7, which is a medium-low risk class.

This classifies potential losses due to future performance at a medium-low level and poor market conditions are unlikely to affect our ability to pay you out. Be aware of currency risk. You may receive payments in a currency different from your reference currency, so the final return you receive will depend on the exchange rate between the two currencies. This risk is not included in the indicator above. The sub-fund is also exposed to the following materially relevant risks not included in the summary risk indicator: Other risk factors may exist. This product does not protect against future market performance. so you may lose all or part of your investment. If we are unable to pay you what you owe, you may lose your entire investment.

Econopolis Smart Convictions Fund

Objectives:

This objective is pursued by investing the sub-fund's assets directly or indirectly through mutual funds, including Exchange Traded Funds (ETF), in equities and fixed income instruments, as well as cash or other monetary instruments, without geographical limitation and without sector or currency restrictions. The sub-fund may invest more than 50% of its net assets through mutual funds, including Exchange Traded Funds (ETF). The individual weight of each asset class (equities, fixed income instruments and derivatives, as well as cash or other monetary instruments) may vary from 0 to 100%, depending on economic and market conditions and the manager's expectations and strategic views. The sub-fund may invest up to 50% of its assets in emerging markets instruments (i.e. instruments issued by entities or governments that have their headquarters or place of business or principal listing in emerging markets, defined as constituents of the MSCI Emerging Markets index).

For the purpose of implementing its main investment policy or investing its cash, the sub-fund may also invest up to a total of 49% in treasury bills, deposits, commercial paper and time deposits. Additionally, the sub-fund may hold cash sight deposits up to 20% of its assets. The sub-fund may invest in derivative financial products, including futures, options, forward foreign exchange contracts, credit default swaps or interest rate swaps, for the purpose of achieving its investment objectives and hedging risk. The sub-fund promotes environmental or social characteristics. This sub-fund is subject to a sustainable investment policy, which can be accessed at <https://www.econopolis.be/en/sustainability>. Additional information on sustainability is available in the fund's prospectus. Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark. For the purpose of implementing its principal investment policy or investing its cash, the sub-fund may also invest up to a total of 49% in treasury bills, deposits, commercial paper and time deposits. Additionally, the sub-fund may hold cash sight deposits up to 20% of its assets. The sub-fund may invest in derivative financial products, including futures, options, forward foreign exchange contracts, credit default swaps or interest rate swaps, for the purpose of achieving its investment objectives and hedging risk. The sub-fund promotes environmental or social characteristics. This sub-fund is subject to a sustainable investment policy, which can be accessed at <https://www.econopolis.be/en/sustainability>.
